

レポートP122 1 (1)

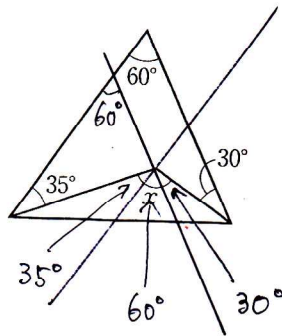

$$\angle O + \angle x + 30 + 35 + 60 = 180$$

$$\angle O + \angle x = 180 - 30 - 35 - 60 = 55$$

$$\angle O + \angle x = 55$$

$$\angle x = 180 - 55 = 125^\circ$$

平行線を2本引くと 錯角と同位角によって 等しい角ができて
 $\angle x = 35 + 60 + 30 = 125^\circ$
